

Count of review_id by Neighbourhood

Count of review_id by Bedrooms

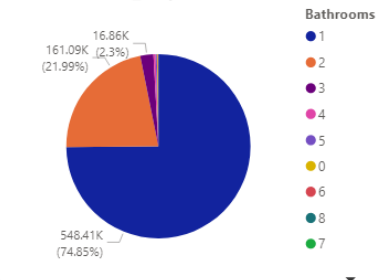

review_id by Listing_type

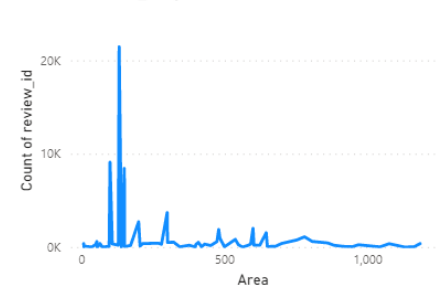

Graphs showing the popularity of a listing, measured by the count of reviews made on a listing, against different metrics such as the most popular neighbourhood, number of bathrooms and bedrooms, the type of listing and its floor area. This will help hosts identify what type of listing would bring in the most profit if considering buying a property to let or which of their listings is most active/ valuable if considering taking one of their listings off the market. (see page 2 for visualisation of the correlation between price and listing popularity)

Count of review_id by Bathrooms

Count of review_id by Area

Count of review_id by listingPrice
